DETAILED ACTION

1. This action is issued in responds to applicant amendment filed 9/25/06.

- 2. Claims 1-34 were canceled. Claims 35-54 were added.
- 3. Claims 35-54 are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Regarding claims 35-54, the phrase "an example" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d). It's unclear if the example is to define the set of information or the set of information is only example of the information sought.

Clarification is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 2164

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 35, 36, and 40-44, are rejected under 35 U.S.C 102(b) as being anticipated by Mizutani et al. (Mizutani hereinafter) (US Patent No. 6,801,916).

Regarding Claims 35, 45, 49 and 53, Mizutani discloses a computer-implemented method comprising:

receiving a set of information that defines an example of information that is being sought (Fig. 8, DOCUMENT 1, Col. 5, lines 1-10, Mizutani);

locating occurrences of the received set of information in a database (Fig. 8, SKIP PLURAL CHARACTER CONSTITUENT, Col. 5, lines 11-17, Mizutani);

analyzing the occurrences of the received set of information (Fig. 8, 105, lines 21-24, Mizutani); and

generating, based on the analysis, a pattern in which the set of information occurs in the database (Fig. 9, 208, Col. 6, lines 59-65, Mizutani).

Regarding Claims 36, and 47, Mizutani discloses a method wherein the pattern is defined as text that matches a regular expression (Fig. 2, TEXT DATA, Col. 5, lines 45-54, Mizutani).

Regarding Claims 40, 46, and 50, Mizutani discloses a method further comprising:

determining a plurality of different patterns based on the analysis of the occurrences of the set of information (Col. 4,lines 38-42, Mizutani).

Regarding Claim 41, Mizutani discloses a method further comprising:

Application/Control Number: 10/734,111

Art Unit: 2164

using the pattern to locate occurrences of additional sets of information (Col. 4, lines 43-49, Mizutani).

Regarding Claims 42, 48, and 51, Mizutani discloses a method further comprising:

analyzing the additional sets of information to determine an additional pattern in which the additional sets of information occur in the database (Col. 12, lines 11-18, Mizutani).

Regarding Claims 43, and 52, Mizutani discloses a method wherein the pattern is defined by a regular expression, context free grammar, or computable function (Col. 12, lines 50-65, Mizutani).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 37-39, and 54 are rejected under 35 U.S.C. 103(a) as being unpatentable over de Hita et al (de Hita hereinafter) (US Patent No. 6,081,774).

Regarding Claims 37, and 54, Mizutani discloses all the claimed subject matter as stated above. However, the Mizutani is silent with respect to the method wherein the text includes hyper-text markup language (HTML). On the other hand de Hita at Col. 7, lines

10-22 discloses a text includes HTML. It would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the HTML text in the Mizutani system since both art deals with search text and both from the same endeavor and there will expectation of success when the Mizutani system deals with the HTML language which will improve the use of the system and increase the number of users since the use of the World Wide Web at the time the Mizutani was made is very common among users around the world.

Regarding Claim 38, the combination of Mizutani in view of de Hita discloses a method wherein the pattern includes middle text, where the middle text is between elements in the set of information (Col. 4, lines 10-14, Mizutani).

Regarding Claim 39, the combination of Mizutani in view of de Hita discloses a method wherein the pattern includes prefix text and suffix text, where the prefix text precedes the elements in the set of information and the suffix text follows the elements in the set of information (Col. 4, lines 23-33, Mizutani).

Regarding Claim 44, the combination of Mizutani in view of de Hita discloses a method wherein the database includes the World Wide Web (Col. 7, lines 15-22, de Hita, where in the web browser and internet correspond to the World Wide web).

Art Unit: 2164

Response to Arguments

Applicant's arguments with respect to claims 35-54 have been considered but are

moot in view of the new ground(s) of rejection.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of

time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the

advisory action. In no event, however, will the statutory period for reply expire later than

SIX MONTHS from the mailing date of this final action.

Point of Contact

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sana Al-Hashemi whose telephone number is 571-272-4013. The examiner can normally be reached on 8Am-4:30Pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Rones can be reached on 571-272-4085. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
